# EPAC Emergency Power and Communications

EPAC delivers emergency power, communications, and scalable solutions for disaster recovery with solar, LTE, 5G, and hybrid power support.

Introducing Motive's New EPAC (Emergency Power and Communications) Disaster Recovery platform. This self-contained unit provides everything your emergency response teams need in the unfortunate event of an emergency / disaster situation. Our EPAC has been engineered to provide critical infrastructure in a multitude of environments and situations.

This unique platform is always ready to provide emergency communications regardless of what carrier you have. By scanning a QR code with your Android or iOS device, you

are effortlessly ready to communicate. Our EPAC system is also extremely versatile when it comes to on-demand power requests by supplying readily available AC and DC power. This extremely efficient power system is also backed by 3.44kW of solar panels that can be quickly deployed and easily tucked away for travel. One of the best features of our EPAC is its scalability. From facial recognition cameras, to self-contained water purification systems, and a multitude of emergency response gear that can be added to our EPAC system. The EPAC can be deployed by itself or as part of a mesh network for a broader area of communications.

### Features and Options

- Wireless Communications Hub for Disaster & Emergency Relief
- WiFi / Private LTE Options
- QR Code Activates WiFi Connectivity Instantly
- Voice, Text, & Video Streaming
- Mesh Network Compatible
- Long / Short Term Deployment
- Hybrid Power from Solar, Generator, & Batteries
- Scalable Solar & Fuel Tanks for Greater Autonomy
- 250A -48VDC & up to 60A 120/240VAC Outputs to Power Internal & Local Equipment
- All Weather
- Motion Activated Security PTZ Camera with Facial Recognition
- 2 Way Audio Communication
- Phone & Electronics Charging Stations
- Water Filtration
- Hand & Power Tool Supply Bins
- USB Charging Ports & Convenience Outlets

### Areas of Expertise

Motive is a full service, self-performing, EPC (Engineer/Procure/Construct) infrastructure solutions provider for the wireless and wireline telecommunications industry with special emphasis on rapidly deployable power and communications equipment for emergency and disaster response.

- Site Acquisition & Entitlements
- Architecture, Engineering & Design
- Project & Construction Management
- Installation & Maintenance
- Product Sales & Distribution
